Romesh Jain

Software Engineer · React.js · Next.js · React Native · Node.js · AI-Augmented Full-Stack Development

+91-9516949156 | ✉ romeshjainofficial@gmail.com | in LinkedIn | gh GitHub | PF Portfolio

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript
Frontend	React.js, Next.js (SSR/SSG/ISR), Redux Toolkit, Tailwind CSS, NativeWind, HTML5, CSS3
Mobile	React Native, Ionic Capacitor, Android Deployment, Biometric Auth, Offline Caching
Backend	Node.js, Express.js, REST APIs, JWT, Firebase (Auth, FCM, Firestore), WebSockets
Databases	MongoDB, PostgreSQL, Firestore, Redis, Supabase
Integrations	Stripe, Google Maps API, Calendly, OneSignal, Social Login (OAuth 2.0)
Tools & Ops	Git, GitHub, Postman, Vercel, Netlify, Figma, CI/CD, Agile/Scrum
AI & Dev	Claude, GitHub Copilot, Ollama (Local LLMs), Prompt Engineering, AI-assisted workflows

PROFESSIONAL EXPERIENCE

DigiMonk Technologies
Gwalior, India

Software Engineer — Jan 2026 – Present

- Architected multi-tier RBAC admin panels (super-admin, clinician, content-admin) across 3 production apps; used AI-assisted code generation (Copilot + Claude) to produce ~**70% of scaffold code**, accelerating feature delivery.
- Built real-time chat + push notification system via WebSockets and Firebase FCM, improving response times and boosting user engagement across apps.
- Improved Lighthouse performance scores through Next.js code-splitting, lazy loading, and image optimisation on high-traffic dashboards.

Associate Software Engineer — Dec 2024 – Jan 2026

- Engineered a shared React.js / React Native component library adopted across 4+ apps, eliminating code duplication and accelerating sprint delivery.
- Delivered data-heavy dashboards with SSR pagination, debounced search, and infinite scroll – handling large datasets with zero observable lag.
- Integrated Stripe, Google Maps API, Firebase Auth, and OneSignal across 5 projects with zero post-launch regressions.

Graduate Trainee — Apr 2024 – Dec 2024

- Contributed production-ready components from sprint one; reduced UI bug backlog through systematic layout audits and cross-browser testing; onboarded into Git, CI/CD, and PR review workflows within the first month.

InOffice Labs
Remote

Web Developer Intern — Oct 2023 – Mar 2024

- Built pixel-perfect, reusable React.js components from Figma mockups; adopted product-wide with no rework required.

KEY PROJECTS

PROTOCOL – Health-Tech Diagnostics Platform | *Next.js · Redux · Stripe · Calendly API · REST APIs*

- AI-driven patient dashboards with biomarker scores; integrated Stripe subscriptions and Calendly booking, reducing manual operations overhead.

AI-Powered LMS [GitHub] | *React Native · Node.js · LLM Integration · AI-Augmented Dev*

- Fully functional LMS featuring biometric auth, AI learning assistant, offline caching, and push notifications – **100% AI-assisted** (Claude + Copilot) in **3 days** alongside a full-time job.

SAHEL – Service Booking Platform | *Next.js · React Native · Redux · Firebase · WebSockets · Node.js*

- Cross-platform app (mobile + web admin) with real-time technician dispatch, multi-tier RBAC, and FCM notifications segmented by city and schedule.

SuprFind – Local Business Listing Platform | *Next.js · Redux · Google Maps API*

- Advertiser and admin panels with Google Maps geo-search, pin-drop, and analytics tracking impressions, visits, and calls.

ACHIEVEMENTS & CERTIFICATIONS

- Anthropic Certifications: Claude 101, Claude Code in Action, Introduction to Agent Skills | Be10X: AI Tools Workshop
- Promoted Trainee → Associate → Software Engineer in **21 months** – fastest in the team, driven by consistent delivery quality.
- Velotio Weekly LinkedIn Quiz Winner – recognised among top respondents for technical accuracy.

EDUCATION

Bachelor of Computer Applications (BCA) | **Makhanlal Chaturvedi University, Gwalior**
Jun 2020 – Jun 2023

CGPA: 7.67/10.0 | Data Structures & Algorithms, Operating Systems, Software Engineering
